Dear Residential Customer:

RE: Electronic Waste Recycling Program

Allied Waste Services/Republic Services remains dedicated to preserving the environment while providing the most cost-effective programs for solid waste collection and disposal. Very few companies can equal the operational capabilities, financial stability, capital resources, broad experience, and proven skill that Allied Waste Services/Republic brings to the area municipalities and business communities.

The State of Pennsylvania recently passed new laws and regulations that heighten the State's and Landfill industry's enthusiasm to protecting the environment. This new legislation has come about in several phases-in periods over the past two years. In January 2013 the final segment will come into Law - banning Electronic Waste (E-Waste) for being disposed of in municipal landfills.

As a result Allied/Republic will no longer be collecting the banned materials from your residents effective January 1, 2013. Enclosed are several pieces of educational materials, from statewide industry sources and the Pennsylvania Department of Environmental Protection (PA DEP) to aid in your community's response to the new law and regulations.

The state of Pennsylvania has developed many excellent programs throughout the state to gather and process the banned E-Waste. The State has spent a significant amount of time developing the Web-Site and related materials. I would encourage you to review the attached documents and visit the Web-Site available and if necessary contact the PA DEP for additional information if necessary.

I am available to answer any questions you may have. Please contact me by e-mail at [jmcgoran@republicservices.com](mailto:jmcgoran@republicservices.com) or by phone at 724-695-4414.

Sincerely,

John McGoran - Municipal Marketing Manager
